Building upon the book *Disappearing Destinations* (Jones and Phillips 2010) and its conclusion that promoted the need to recognize problems, meet expectations and manage solutions *Global Climate Change and Coastal Tourism* explores current threats to, and consequences of, climate change on existing tourism coastal destinations. Part 1 of the book provides a theoretical platform and addresses topics such as sustainability, tourism impacts, governance trade and innovation and how the media addresses climate change and tourism. It also assesses management and policy options for the future sustainability of threatened tourism coastal destinations. Part 2 presents case studies from all regions of the world (Europe, The Americas, Asia, Africa and Australasia) which synthesise findings to make recommendations that can be used to promote strategies that ameliorate projected impacts of climate change on coastal tourism infrastructure and in turn promote the future sustainability of coastal tourism destinations. This is a timely and informative text with appeal to researchers, undergraduate and post graduate students of tourism management, tourism planning, sustainable tourism development and leisure management, coastal tourism/management, environmental management/planning, geography, coastal zone management or climate change studies.

How do Canadian provincial and territorial governments intervene in the cultural and artistic lives of their citizens? What changes and influences shaped the origin of these policies and their implementation? On what foundations were policies based, and on what foundations are they based today? How have governments defined the concepts of culture and of cultural policy over time? What are the objectives and outcomes of their policies, and what instruments do they use to pursue them? Answers to these questions are multiple and complex, partly as a result of the unique historical context of each province and territory, and partly because of the various objectives of successive governments, and the values and identities of their citizens. *Cultural Policy: Origins, Evolution, and Implementation in Canada's Provinces and Territories* offers a comprehensive history of subnational cultural policies, including the institutionalization and instrumentalization of culture by provincial and territorial governments; government cultural objectives and outcomes; the role of departments, Crown corporations, other government organizations, and major public institutions in the cultural domain; and the development, dissemination, and impact of subnational cultural policy interventions. Published in English.

This book reviews the cultural tourism market in Europe from a survey carried out in 1997. It analyzes the way in which cultural attractions are produced for, and used by, cultural tourists and how such cultural attractions as museums, art galleries, monuments and heritage attractions are marketed.

Sessional Paper Rama

This book covers a very broad range of topics in marketing, communication, and tourism, focusing especially on new perspectives and technologies that promise to influence the future direction of marketing research and practice in a digital and innovational era. Among the areas covered are product and brand management, strategic marketing, B2B marketing and sales management, international marketing, business communication and advertising, digital and social marketing, tourism and hospitality marketing and management, destination branding and cultural management, and event marketing. The

book comprises the proceedings of the International Conference on Strategic Innovative Marketing and Tourism (ICSIMAT) 2018, where researchers, academics, and government and industry practitioners from around the world came together to discuss best practices, the latest research, new paradigms, and advances in theory. It will be of interest to a wide audience, including members of the academic community, MSc and PhD students, and marketing and tourism professionals.

"Dawson's analysis draws on promotional pamphlets, newspaper advertisements, and films as well as archival sources about government, civic, and international tourism organizations. He argues that in order to understand the roots of the fully fledged consumer culture that developed in Canada, it is necessary to understand the connections between the 1930s, 1940s, and the postwar era. He underlines the significance of the Depression and the Second World War - ostensibly periods of "underconsumption"--For the development of tourism promotion and consumerism in general." "This cultural history will be welcomed by British Columbian and Canadian historians, as well as scholars of consumer culture and tourism."--Jacket.

Global Climate Change and Coastal Tourism Rama Publishers

Tourism has become a major international industry, with many countries all over the world relying on the income it produces. Because it is a major source of finances and employment, government and other institutions actively promote tourism, regardless of the impact on the environment, ecology and social structure of the region. The demands of tourism can contribute to the destruction of the natural and cultural environment upon which it depends. The natural and cultural landscape's capacity to accommodate the local and worldwide effects of tourism, the typology thereof and its implications for the economy and society constitute very important study objectives. The development of tourism can result in the degradation of natural landscapes that paradoxically attract tourists to such areas. Featured topics include: Tourism Strategies; Tourism as a Tool of Development; Tourism Impact; Tourism and Protected Areas; Rural Tourism; Community Involvement; IT and Tourism; Climate Change and Tourism;

Environmental Issues; Art, Architecture and Culture; Modelling; Emergent Strategies for Tourism Development; Landscape and Tourism; Tourism and Urban Planning.

Adventure Games International Monetary Fund

The genre of adventure games is frequently overlooked. Lacking the constantly-evolving graphics and graphic violence of their counterparts in first-person and third-person shooters or role-playing games, they are often marketed to and beloved by players outside of mainstream game communities. While often forgotten by both the industry and academia, adventure games have had (and continue to have) a surprisingly wide influence on contemporary games, in categories including walking simulators, hidden object games, visual novels, and bestselling titles from companies like Telltale and Campo Santo. In this examination of heirs to the genre's legacy, the authors examine the genre from multiple perspectives, connecting technical analysis with critical commentary and social context. This will be the first book to consider this important genre from a comprehensive and transdisciplinary perspective. Drawing upon methods from platform studies, software studies, media studies, and literary studies, they reveal the genre's ludic and narrative origins and patterns, where character (and the player's embodiment of a character) is essential to the experience of play and the choices within a game. A deep structural analysis of adventure games also uncovers an unsteady balance between sometimes contradictory elements of story, exploration, and puzzles: with different games and creators employing a multitude of different solutions to resolving this tension.

The 2014 International Conference on Information GIS and Resource Management (ICGRM2014) was held in Guangzhou, China, from January 3 to January 5, 2014. ICGRM2014 aims to bring researchers, engineers, and students to the areas of GIS and Resource Management. ICGRM2014 features unique mixed topics of Computer Science, Earth Science, Surveying and Mapping, and Resources and Environment Science in the context of building healthier ecology and environment. The conference will provide a forum for sharing experiences and original research contributions on those topics. The proceedings of ICGRM2014 tends to collect the up-to-date, comprehensive and worldwide state-of-art

knowledge on GIS and resource management. All of accepted papers were subjected to strict peer-reviewing by 2-4 expert referees. The papers have been selected for this proceedings based on originality, significance, and clarity for the purpose of the conference. The selected papers and additional late-breaking contributions to be presented will make an exciting technical program on conference. The conference program is extremely rich, featuring high-impact presentation. We hope this conference will not only provide the participants a broad overview of the latest research results on GIS and resource management, but also provide the participants a significant platform to build academic connections. The Technical Program Committee worked very hard to have all papers reviewed before the review deadline. The final technical program consists of 57 papers which are divided into four sessions.
