Kissing Architecture

explores the mutual

attraction between

architecture and other

forms of contemporary

art. In this fresh,

insightful, and beautifully

illustrated book,

renowned architectural

critic and scholar Sylvia

Lavin develops the

concept of "kissing" to

describe the growing

intimacy between

architecture and new

types of art--particularly

multimedia installations

that take place in and on

the surfaces of buildings--

and to capture the

sensual charge that is

being designed and built

into architectural surfaces

and interior spaces today.

Initiating readers into the

guilty pleasures of

architecture that

abandons the narrow

focus on function, Lavin

looks at recent work by

Pipilotti Rist, Doug Aitken,

the firm Diller Scofidio +

Renfro, and others who

choose instead to

embrace the viewer in

powerful affects and

visual and sensory

atmospheres. Kissing

Architecture is the first

book in a cutting-edge

new series of short,

focused arguments

written by leading critics,

historians, theorists, and

practitioners from the

world of urban

development and

contemporary

architecture and design.

These books are intended

to spark vigorous debate.

They stake out the

positions that will help

shape the architecture

and urbanism of

tomorrow. Addressing one

of the most spectacular

and significant

developments in the

current cultural scene,

Kissing Architecture is an

entertainingly irreverent

and disarmingly incisive

book that offers an

entirely new way of

seeing--and experiencing--

architecture in the age

after representation.

Description: If you heard that one president deported more people than any other president, started the program of family separation, and did nothing to stop Russia's election meddling, how many of them would guess it was Obama? In *50 Things They Don't Want You to Know* Jerome Hudson dives deeply into the things Americans are not supposed to realize. Many of our most hotly debate topics are shaped by Davos power brokers, woke college professors, TV talking heads, social media activists and feckless Washington swamp monsters who want you to only follow their narrative. Your teachers, your politicians, and your local paper are not likely to ever tell you: Racial minorities fare far better in the absence of race-based affirmative action policies. Latinos

make up a little more than 50% of the Border Patrol, according to 2016 data. The U.S. settled more refugees in 2017 than any other nation. Between 2011 and 2016, the IRS documented 1.3 million identity thefts by illegal aliens. Half of federal arrests are immigration-related. Welfare recipients in 34 states earn more than a person making minimum wage. Taxpayers doled out \$2.6 billion in food stamps to dead people in less than two years. 1,700 private jets flew to Davos to discuss the impact of global warming. Google could swing an election by secretly adjusting its search algorithm, and we would have no way of knowing. Once you're done reading *50 Things They Don't Want You to Know*, you'll never trust the powers that be to give you the whole truth again.

How to achieve a happier and healthier game design process by connecting the creative aspects of game design with techniques for effective project management. This book

teaches game designers, aspiring game developers, and game design students how to take a digital game project from start to finish—from conceptualizing and designing to building, playtesting, and iterating—while avoiding the uncontrolled overwork known among developers as “crunch.” Written by a legendary game designer, *A Playful Production Process* outlines a process that connects the creative aspects of game design with proven techniques for effective project management. The book outlines four project phases—ideation, preproduction, full production, and post-production—that give designers and developers the milestones they need to advance from the first glimmerings of an idea to a finished game.
