Become a voting expert with a clear understanding of the election process. Our resource breaks down the differences between a presidential, parliamentary and dictatorship government. Travel back to ancient times to experience the first voting system. Explore the concept of a democratic government and whether it truly represents the people. Discover how the president has to share powers with the legislature in a presidential system. Explain why it is easier to pass laws in the parliamentary system than in the presidential system. Roleplay as a member of Parliament and deliver a 90-second statement about an

important issue. Find out why most dictators were military leaders, and how the role of dictator has changed over time. Learn about suffrage and what the requirements are for a citizen to be allowed to vote. Hold your own election to decide on a policy for running your classroom. Aligned to your State Standards and written to Bloom's Taxonomy, additional writing tasks, crossword, word search, comprehension quiz and answer key are also included.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public

transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome. Preventing Reading Difficulties in Young Children The Reading Company  
The acclaimed novel of love, ambition, and Arctic adventure "told with fin de siècle elegance"—with an introduction by Philip Pullman (Kirkus Reviews). It is July 1897, at the

northernmost reach of the inhabited world. Swedish inventor Gustav Crispin is determined to become the first person to set foot on the North Pole, and return, borne by hot air balloon. Making the expedition with two companions—an American journalist and a young, French-speaking adventurer—all three climb into the small wicker gondola and cut the ropes. But as Gustav pursues his history-making ambition, and their flimsy balloon is battered by Arctic winds, his mind returns again and again to his fraught romance with the beautiful Luisa. Nominated for the National Book Award in 1977, *The Balloonist* was hailed by Mary Renault as a “tour de force.” The story of Gustav Crispin is “chilling and comic by turn . . . An unusual mixture of Arctic adventure and Parisian love story with philosophic overtones” (Kirkus Reviews).

In winter 2014, a Tibetan monk lectured the world leaders gathered at Davos on the importance of Happiness. The recent DSM-5, the manual of all diagnosable mental illnesses, for the first time included shyness and grief as treatable diseases. Happiness has become the biggest idea of our age, a new religion dedicated to well-being. In this brilliant dissection of our times, political economist William Davies shows how this philosophy, first pronounced by Jeremy Bentham in the 1780s, has dominated the political debates that have delivered neoliberalism. From a history of business strategies of how to get the best out of employees, to the increased level of

surveillance measuring every aspect of our lives; from why experts prefer to measure the chemical in the brain than ask you how you are feeling, to why Freakonomics tells us less about the way people behave than expected, The Happiness Industry is an essential guide to the marketization of modern life. Davies shows that the science of happiness is less a science than an extension of hyper-capitalism.
