Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

April 15th is the most dreaded day of the year. We are not looking forward to this day because getting everything together can be so stressful. The ELITE 365 Tax Day Planner will help you keep all of your important documents in one safe place, so when it is time to file your taxes, everything will be ready to go! This also ensures getting your taxes prepared more quickly and accurately. Filing your taxes is not as easy as it seems. In fact it takes a lot of planning & file management. During appointments I noticed that the clients I was servicing were not 100% prepared to file their taxes. I was surprised by their lack of knowledge when it comes to tax preparation so I felt the need to do something to help people

who just didn't know where to start. The purpose of creating this planner is to help you, the taxpayer maximize your refund or minimize any balance due to Uncle Sam by making sure you have everything you need to file a complete and accurate tax return on time, the first time.
